## Welcome to Eye Center of Texas

**For your convenience, parking at all our locations is free. Food and drinks are not allowed in the office.** Some of our patients are very ill; therefore we ask that you **do not bring children** to your appointment. Your appointment may last one to three hours.

**To avoid a delay in your appointment time,** please fill out the enclosed forms and bring them with you to your appointment. A map is enclosed with your appointment clinic, date, and time.

You are responsible for payment for our physicians' services and any testing done during your visit. Therefore, please call Eye Center of Texas at 713-797-1010 (ask for the insurance department) with your insurance information prior to your visit. Our insurance person must have your social security number, date of birth, and the name of the insured person. If insurance is through your spouse, that person's date of birth and social security number must also be given. With this information we can verify your insurance prior to your appointment day. If you gave this information to Eye Center of Texas when you made your appointment, you do not need to call.

**If your insurance carrier is an HMO,** you must contact your Primary Care Physician (PCP), who is listed on your insurance card, and ask for an insurance authorization. If you are not sure about your benefits, call your insurance company (the phone number is on your insurance card) to find out. If we do not have a referral from your PCP on your appointment day, we regret that we must reschedule your appointment. According to the law (HIPAA) and our office policy, we cannot call your PCP for you.

**If you are a cataract patient** and you wear contact lenses, it is extremely important you discontinue contact lens wear before your appointment. For hard contacts, you must **not** wear your contacts for 3 weeks prior to your appointment. For soft contact lenses, you must **not** wear them for at least 2 weeks prior to your appointment. If you do not follow these guidelines, your testing will be inaccurate and will not be completed. Contact lenses alter the shape of your cornea making it difficult for the technician to get correct readings from the equipment.

Please visit our website at [www.eyecenteroftexas.com](http://www.eyecenteroftexas.com) for doctor biographies, clinic locations, maps, ocular conditions, and other helpful information. We appreciate you choosing Eye Center of Texas for your medical/surgical eyecare.
